American Fire Equipment Sales & Service Corporation

American Fire Equipment is a highly successful woman/veteran owned company established in 1992. In February of 2012 we celebrated our 20th anniversary. The corporate office is located in Phoenix, Arizona with two satellite offices; one in Yuma, Arizona and one in Pinetop, Arizona.

American Fire Equipment conducts business in the southwest region of the U.S. with additional licenses in California, Nevada and New Mexico. We currently service the region with 140 loyal employees.

Our primary focus is to provide the highest level of quality life safety fire protection available. We ensure our high standards are met through unprecedented quality assurance and technical training programs. Our core business is to provide commercial fire protection for healthcare facilities, power plants, mines, data centers, government agencies, schools and other industrial facilities.

We are a full service fire protection company specializing in complete system design, installation, inspection, preventative maintenance, and emergency service for all types of fire protection systems.

Our company is a UL Listed fire alarm installation contractor and offers the only UL Listed fill station in Arizona.

Our experience and reputation show that integrity and quality workmanship, along with competitive pricing provides a path for long term customer relationships. American Fire Equipment strives to be an asset to each and every customer, not just another contractor.

We have partnered with the best product suppliers available and value the long term relationships with our product manufacturers as well. This close working relationship with our manufacturers helps us with superb knowledge of the equipment we provide. We provide product distribution for many top manufacturers in the fire protection industry such as **Notifier, Ansul, Fike, Minimax, Fenwal, Kidde, Xtralis VESDA, and JANUS.**
